

OUR CLASSROOM NEWS

Ms. Lou

First Grade- Main Teacher (English, Mathematics & Life Studies)

Week of August 2nd- 6th,2021

No.12

Our Learning

English Language and Arts

Phonics - students learned words that have the initial sound /o/. They also came up with their own words that have the /o/ sound whether at the beginning, middle or at the end.

We also watched a short story about the letter Oo.

Through this activity, their listening skills will flourish. They will have the Word Mapping activity. It also will enhance their ability to comprehend the short story.

Every phonics day, students practice reading CVC words. This is one of the first steps for them to learn reading.

Communication - the skills that we focused on are speaking and writing.

We discussed about the family, particularly the different members of the family. In this topic, I integrated related topics such as occupations.

As we move forward with this topic, sports and hobbies will be discussed.

Life Studies- students' learned the different parts of a plant.

We watched a short movie showing the process of how these parts evolve. We went outside to have them draw their Morning glories and label the parts as an activity.

Mathematics- this week students' learned expressions on Subtraction.

"How many left?" "There are _____ left." It was done

Naturally and orally with various samples written on the whiteboard.

Reminder

The following are some activities for the student's to do while on summer vacation;

English Language Arts

Reading a storybook

(Students' take a video of themselves reading a storybook.

They could choose which part of the story they liked the most and read it while taking a video.

Writing! writing!, writing!

Students' will do some activities in their Workbook.
