Cicadas Singing

Have you been listening? Every morning I can hear them chirp. Can you? Just like the cicadas in the morning, our classes are buzzing and are more alive than ever. Here is a short summary of the past week.

What does it look like to you?

You can turn it left. You can turn it right. You can turn it anyway you like!

Everyone is letting their imagination soar by **ripping**, **tearing**, and carefully looking at abstract pieces of paper.

Just like the clouds in the sky, new shapes and discoveries are forming all around us. **What does it look like to you?**

Let's enjoy throwing games!

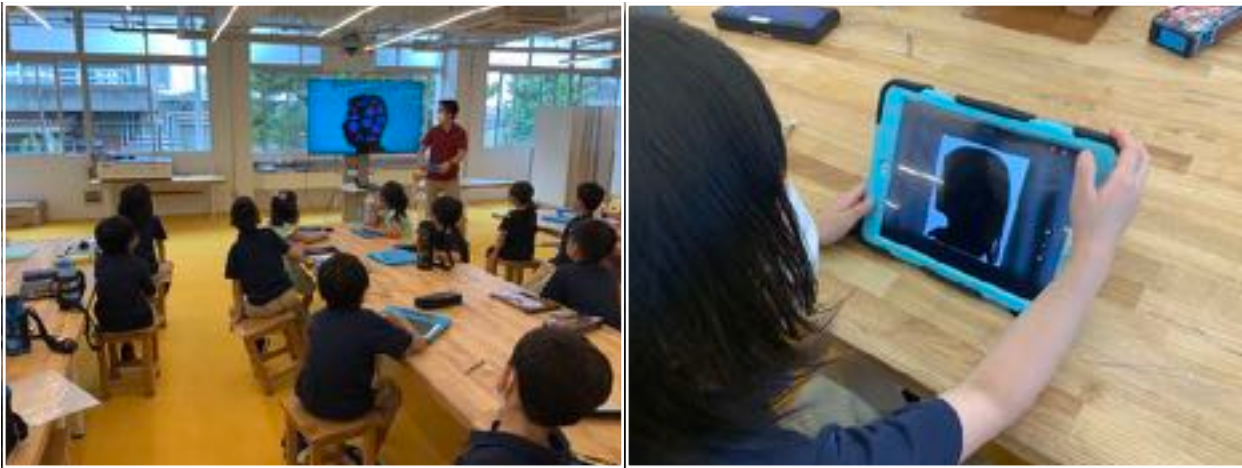

Our new P.E. unit has *kicked off*, but we aren't kicking. We are using our upper bodies to **throw** straighter and further than ever before. We have had some very exciting games of **shootball** this week, haven't we? Perhaps they will include **shootball** in the 2024 Paris Olympics! Wouldn't that be exciting!

Let's keep practicing in case they need team members. 💪

What's in our heads?

Mr. Aratani has once again shown us some fantastic ICT tips and tricks to let our creative genius reach another level. By smashing 3 different apps together, **camera**, **photos**, **Keynote**, you can show us what's inside of your head! I'm excited to see your silhouettes!

New friends

This week, we had 3 new students in Mercury, and two in Neptune come and experience our world. Everyone was so friendly! I'm know that they had a great time with us. Let's continue to make their time here the best it can be.

Mike
