

SOLAN HARMONY

UPDATE

NEW!

Home Economics

The students are preparing to create their own nutritious and well-balanced school lunch. Before the cooking session, they first designed and created their desired lunchbox meals using modeling clay. The clay creations were realistic and appetizing, showing their creativity, attention to detail, and teamwork.

We are excited to see them bring their ideas to life when they cook their lunches, and we can't wait for the final results!

On that note, today we got to try the new lunchbox meal, and everyone seemed to enjoy it!
