Week 2: Settling In

The 7th graders continue to settle in wonderfully to the new building and their classroom. I'm really pleased with the friendly and supportive atmosphere that the teachers and students have built together!

About English

Combined Class

This year, English classes will no longer be separated by ability. The teachers believe that having mixed-ability classes aligns better with the school's approach.

To ensure everyone gets the right support, each English class will have two teachers: Mr. Anthony and myself. Together, we aim to challenge all students to achieve their individual best in English!

'English World' Project

This week, we started our new 'English World' project using Minecraft, and the students were very enthusiastic! The main goal is to create a relaxed space where they can naturally speak English with each other. Minecraft seemed like a fun and familiar way to do this. After just one lesson, I was already impressed by how much English conversation I heard. It's fantastic to see them engaging and communicating so well!

We will value "Purpose" and "Ownership" for you
