## Let's Play Together

Thank you for all your support in 2025, let's work together in 2026 to finish the school year strong! The students have worked steadily through the textbook and have arrived at the final unit: sports, games, and activities. G4 members have been able to classify different activities using thinking tools as well as make balanced play schedules that incorporate their friends' opinions to ensure everyone has fun! Whether we are playing, going, or doing, our G4 students know how to put their words into action!

## English-in-Action!

In addition to learning about activities and sports in English class, G4 students have been putting their English to good use in P.E. Class! January found our students learning about and developing their volleyball skills. Some students have also gone through the extra effort of writing their reflections in English and giving feedback to one another. The P.E. Team saw lots of supportive communication and teamwork throughout the unit and student relationships flourished. No matter how difficult an activity looks, with the right team by your side, you can accomplish anything!

## Storycraft:

Throughout Q3 and into Q4, the G4 students have been hard at work to bring stories to life! The goal started relatively simple: find a book, enjoy it together, and create a diorama to share the story with an audience. To our immense pleasure, the students kept finding ways to enhance their collaboration and communication skills in English. Students decided team roles that played to each members' strengths. The dioramas have been completed and the students have now begun the last stage of the project: a video presentation using Clips! We hope to share these videos so other students can be inspired to read more books in English!
